## WELCOME

### **Welcome to the Montana Fish, Wildlife & Parks (FWP), Upland Game Bird Enhancement Program (UGBEP).**

The purpose of this program is to enhance upland game bird habitats, increase upland game bird numbers, and to provide free hunting opportunities for upland game bird hunters. FWP partners with private landowners and other individuals, groups, and organizations to improve upland game bird habitat on private and public lands. With nearly 400 active contracts, Montana landowners are conserving and enhancing almost 300,000 acres of upland game bird habitat while providing nearly 800,000 acres for public upland game bird hunting.

Enjoy the fall season and your Montana hunting experience! Please be respectful of the lands you hunt, report any rule violations you may see (1-800-TIP-MONT), and remember to thank the landowners who grant you access to their property.

- Joe Maurier, Director

## HOW TO USE THIS GUIDE

This booklet provides information on each current project, which may be on private, public, or a mix of private and public lands. All projects listed in this booklet require "reasonable" access for upland game bird hunting. Because of the different sizes and qualities of projects, and the benefits they provide to upland game birds, individual private landowners and FWP biologists have jointly identified the levels of access each project area can support.

The enclosed maps show approximate project locations, each designated by a symbol and **Project #**. By looking up the associated project number in the table for the FWP Region, and referring to the location on the insert maps, you can determine how to proceed with acquiring access permission. Areas enrolled in the Block Management Area (BMA) program will require following BMA rules for acquiring permission.

**PERMISSION IS REQUIRED BEFORE HUNTING OR ENTERING ANY PRIVATE LAND PROJECT AREA.** Note: Some areas provide walk-in permission with no further permission required. Please see the corresponding tables for specific details regarding acquiring permission.

**PLEASE, NO SMOKING OR OTHER FIRES  
WHILE ACCESSING ANY OF THESE  
PROPERTIES.**

## BLOCK MANAGEMENT

In addition to the Upland Game Bird Enhancement Program, FWP's Block Management Program also provides for hunter access to private lands. **For some UGBEP projects, public hunting is managed through the Block Management Program.** The UGBEP Projects Access Guide will identify those enhancement projects enrolled in Block Management.

Note: Access acres reported in the UGBEP Projects Access Guide may differ from those acres reported in the Block Management tabloid. Only the access acres contracted under the UGBEP are reflected in the UGBEP Access Guide.

**Hunters are encouraged to contact the appropriate FWP regional office to obtain Block Management Program Materials.** Regional phone numbers for each office are provided on the next page. Information is also available online at [fwp.mt.gov](http://fwp.mt.gov).

## OTHER ACCESS OPPORTUNITIES

Additional upland game bird hunting access may be available on more than 32 million acres of federal, tribal, and state lands within Montana, many of which offer upland game bird hunting opportunities. Information on FWP lands can be obtained from regional offices or by calling the FWP Helena Headquarters at 406-444-2535. Most federal agency offices have maps available that display the locations of federal and tribal lands. Contact tribal fish and game offices for more information.

## WATCH FOR THESE SIGNS!

### **HAND-REARED PHEASANT RELEASE AREA**

PHEASANT RELEASE CONDUCTED IN COOPERATION WITH  
MONTANA FISH, WILDLIFE & PARKS

This area open to public  
upland game bird hunting free of charge.

You must first obtain permission from the Landowner

LANDOWNER \_\_\_\_\_

PHONE \_\_\_\_\_

Montana Fish,  
Wildlife & Parks

### **UPLAND GAME BIRD HABITAT ENHANCEMENT PROJECT**

Developed through the cooperation of the private landowner  
and the Montana Department of Fish, Wildlife & Parks.

This is private property. You must obtain permission from  
the landowner before entering this property.

Phone: \_\_\_\_\_

## PROGRAM DEVELOPMENT

Hunters who have made use of the UGBEP over the past 20 years have undoubtedly noticed significant program changes over time. Future changes will provide direct benefits to upland game bird resources, hunters, and landowners.

FWP and the 12-member advisory council are working cooperatively to review the UGBEP. This year, the council has finalized their recommendation for the UGBEP Strategic Plan. This Strategic Plan may be viewed at [fwp.mt.gov](http://fwp.mt.gov).

For more information, please visit the UGBEP website at [fwp.mt.gov](http://fwp.mt.gov).

*We look forward to hearing from you.*

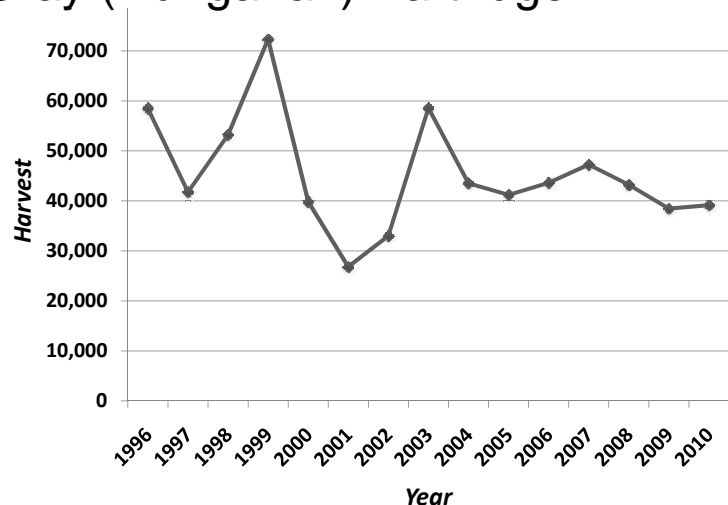

## SPECIES HARVEST TRENDS & DISTRIBUTION MAPS

This section provides a summary of upland game bird distribution and harvest trends in recent years for Montana. Harvest trends are based on hunter harvest survey data. Distribution maps are based on FWP biologists' mapping during the late 1990s. The wild turkey distribution map does not reflect recent turkey transplant efforts.

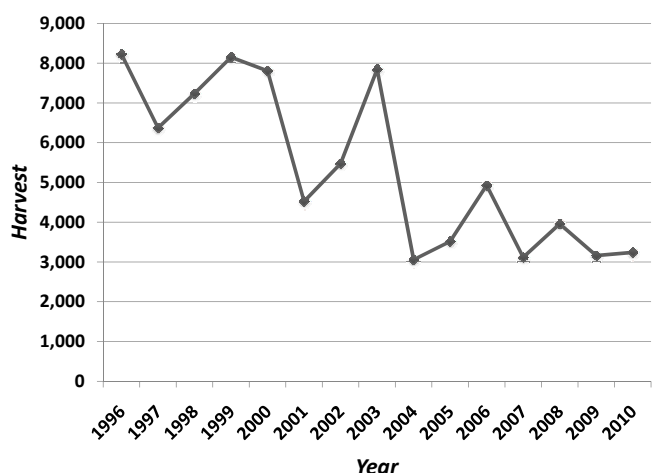

### Dusky (Blue) Grouse

### Gray (Hungarian) Partridge

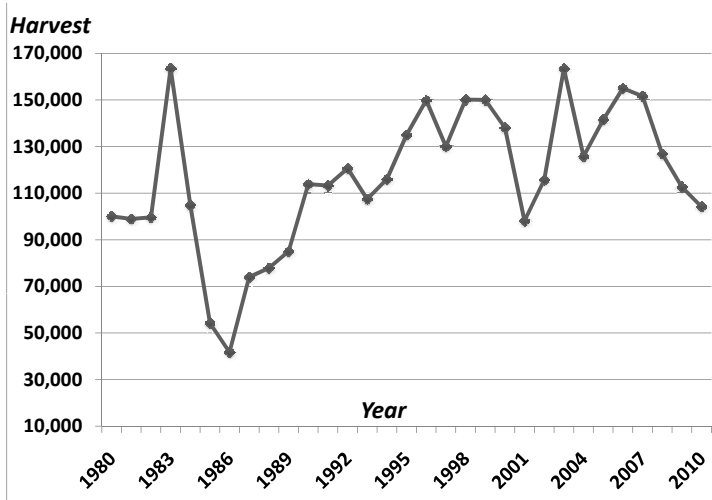

### Greater Sage-grouse

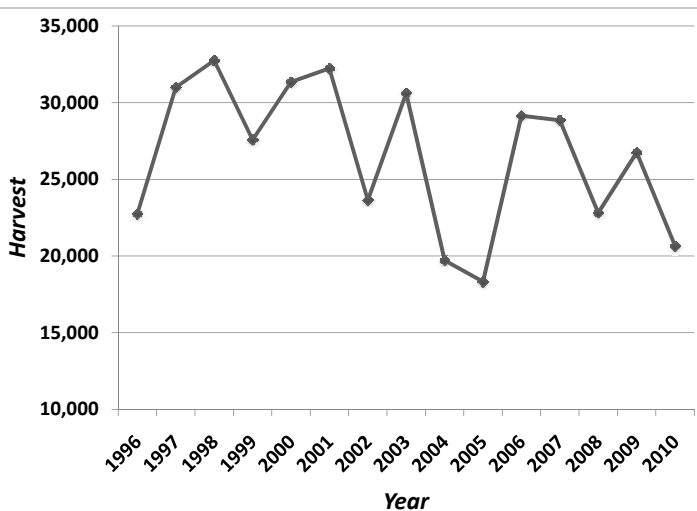

## SPECIES HARVEST TRENDS & DISTRIBUTION MAPS

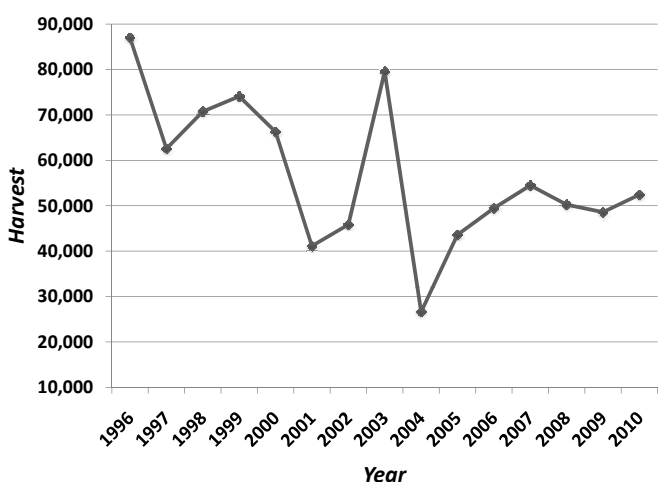

### Ring-necked Pheasant

### Ruffed Grouse

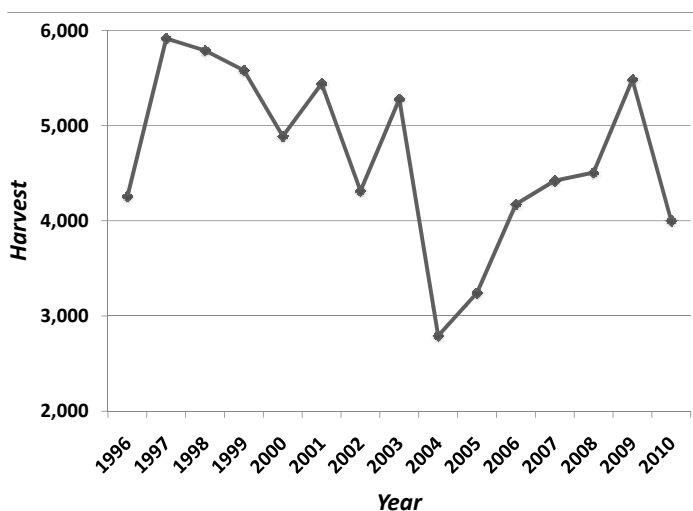

### Sharp-tailed Grouse

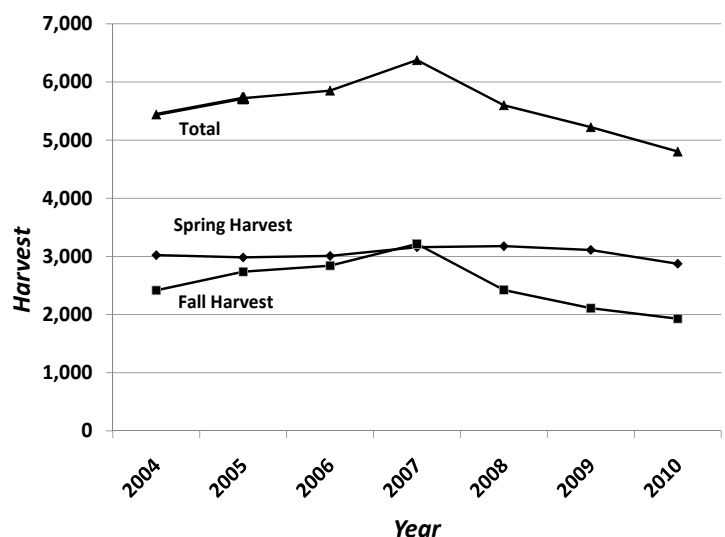

## SPECIES HARVEST TRENDS & DISTRIBUTION MAPS

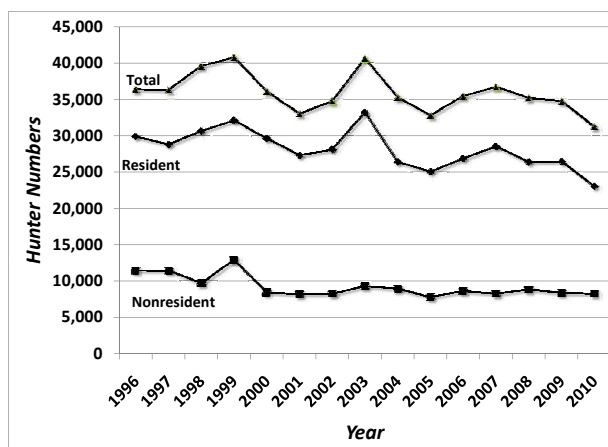

### Spruce Grouse

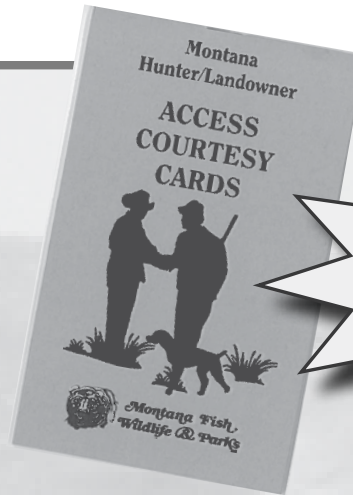

### Wild Turkey

### Upland Game Bird Hunters

# Plan Ahead

Request  
Courtesy Cards  
from any FWP  
office!

- ▶ Show courtesy to landowners
- ▶ Secure permission in advance
- ▶ Follow landowners instructions
- ▶ Ask questions about access policies
- ▶ Provide complete information about yourself
- ▶ Thank landowners after you hunt

**Protect our Hunting Privileges  
Ask Permission — It's the Law!**

# Ask Early

## UPLAND GAME BIRD PROJECTS

The UGBEP helps fund both habitat enhancement projects and pheasant release projects. Each entry in this booklet describes what type of project(s) was funded. Below is a description of common types of projects.

### Aspen Regeneration

Treatments of old and dying aspen stands for the purpose of rejuvenating them, enhancing stand survival, and improving long-term habitat productivity for ruffed grouse.

### Grazing Management System

A grazing management project is a rest-rotation grazing system that provides undisturbed hiding cover on approximately 1/3 of the grazing system area each year. These projects are mostly geared toward prairie grouse and gray partridge, but may also include pheasants.

### Nesting Cover

Many nesting cover projects are associated with the Conservation Reserve Program, in which UGBEP helped pay for a good nesting seed mixture. In general, these plantings may accommodate a mix of pheasant, gray partridge, and sharp-tailed grouse.

### Pheasant Release

Upland Game Bird Enhancement Program reimburses landowners for releasing pen-reared pheasants in habitats that support pheasants, intended for enhancing pheasant populations and hunting opportunities.

### Sagebrush Planting

Habitat restoration projects expand habitat primarily for sage-grouse.

### Sagebrush Lease

FWP enters into 30-year lease agreements with landowners to conserve prime sage-grouse habitat. Through the lease, landowners agree not to spray, burn, plow, or otherwise convert sagebrush grassland habitat. These areas mostly support greater sage-grouse.

### Shelterbelt

Shelterbelts are shrub and tree plantings designed to provide winter cover for pheasants, sharp-tailed grouse, and gray partridge.

### Winter Food or Cover Plot

Domestic grain plantings serve as a winter food source for pheasants and gray partridge, but may also include sharp-tailed grouse.

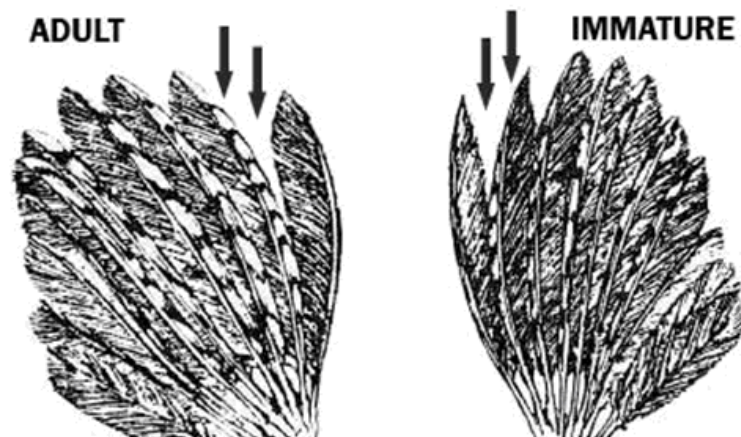

## AGE YOUR GAME BIRD

Some hunters want to know the age of the upland game birds they harvested - whether the birds hatched the previous spring or if they have reached adulthood. Upland game birds in Montana (with the exception of ring-necked pheasants) can be effectively aged by looking at their wings. Ring-neck pheasant roosters show age differences in their spur.

As a group, the prairie grouse species, mountain grouse, and partridge species molt (replace) their wing and tail feather in sequence rather than all at once, as is the case with waterfowl. Each fall, young-of-the-year birds grow wing feathers of adult size during the "post juvenile" (first) molt.

### Game Birds (except ring-necked pheasants)

In upland game birds other than ring-neck pheasants, the two outer primary feathers on the wing of the young bird are not replaced until one year later and annually thereafter. Thus, the two outer primary feathers on a juvenile bird's wing differ in shape from those of an adult, as well as from other feathers on the wing, being more pointed at the tip and sometimes narrower

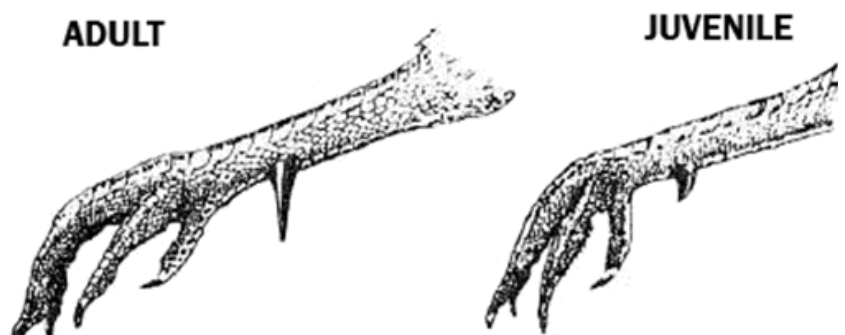

Wings of adult and immature game birds

### Ring-necked Pheasants

Unlike Montana's other upland game birds, ring-necked pheasants often replace the two outer primary feathers during the post-juvenile molt. As a result, immature birds display primary feather of adult shape and closely resemble adults their first fall.

The spur on the back of a male pheasant's leg often is used as a criterion of age. Early in the fall, an adult pheasant will exhibit a much longer spur than a juvenile. However, the spur of a young male bird continues to grow all fall and some "overlap" time exists between the spur length of young and old birds late in the fall. Therefore, the color, shape, and texture of the spur during the fall often helps determine the age.

Ring-necked pheasants can be aged by their spurs.

Pheasant Spur Characteristics			
	Color	Shape	Texture
Adult	Very dark	Very sharp	Hard, glossy surface
Young	Light	Blunt; usually straight along edges	Soft, dull surface

# HELP CONTROL NOXIOUS WEEDS IN MONTANA

Montana is being invaded by noxious weeds accidentally brought here from other parts of the country and around the world. The natural enemies of these plants - diseases and insects - that normally keep these weeds under control in their native homeland didn't make the trip over. Due to the lack of natural controls, combined with aggressive growing characteristics, controlling noxious weeds is very difficult once they've gained a foothold. In Montana, noxious weeds are affecting rangelands and in some cases, reducing the quality and quantity of wildlife habitat. Every year the costs associated with controlling weeds in Montana increases for private landowners, towns, state and federal agencies.

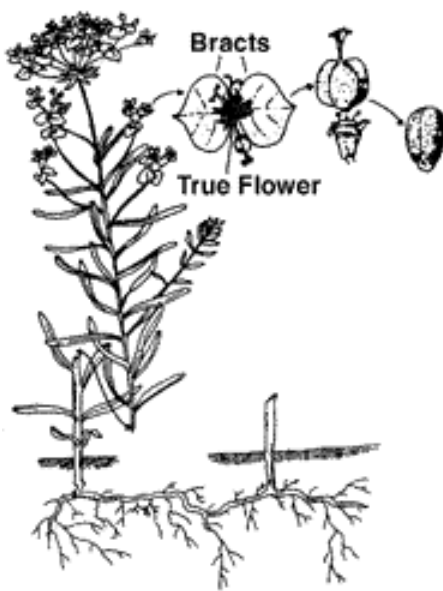

## YES, YOU CAN HELP!

- Learn to identify the types of noxious weeds. Helpful information is available at county weed and extension offices.
- Thoroughly wash your vehicle, especially the underside, before going afield.
- Avoid soil disturbance by traveling only on established roads and trails.
- Hunters using packstock in the hills should use only certified, weed-seed free hay. County extension offices can provide a list of local producers.
- Avoid driving through weed patches and limit your use of weed-infested areas.
- Notify private, state or federal landowners if you encounter weeds on their property.

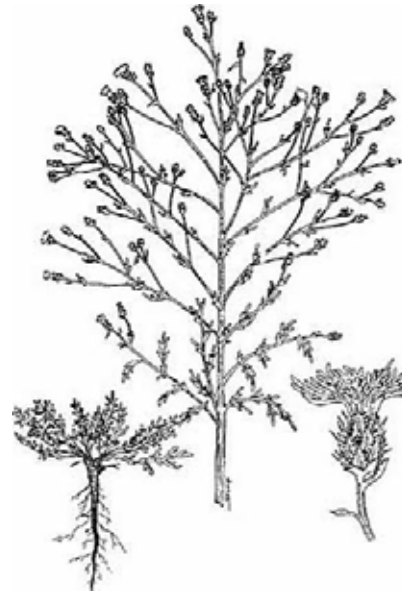

## ***NOXIOUS WEEDS ARE EVERYBODY'S PROBLEM***

Spotted Knapweed

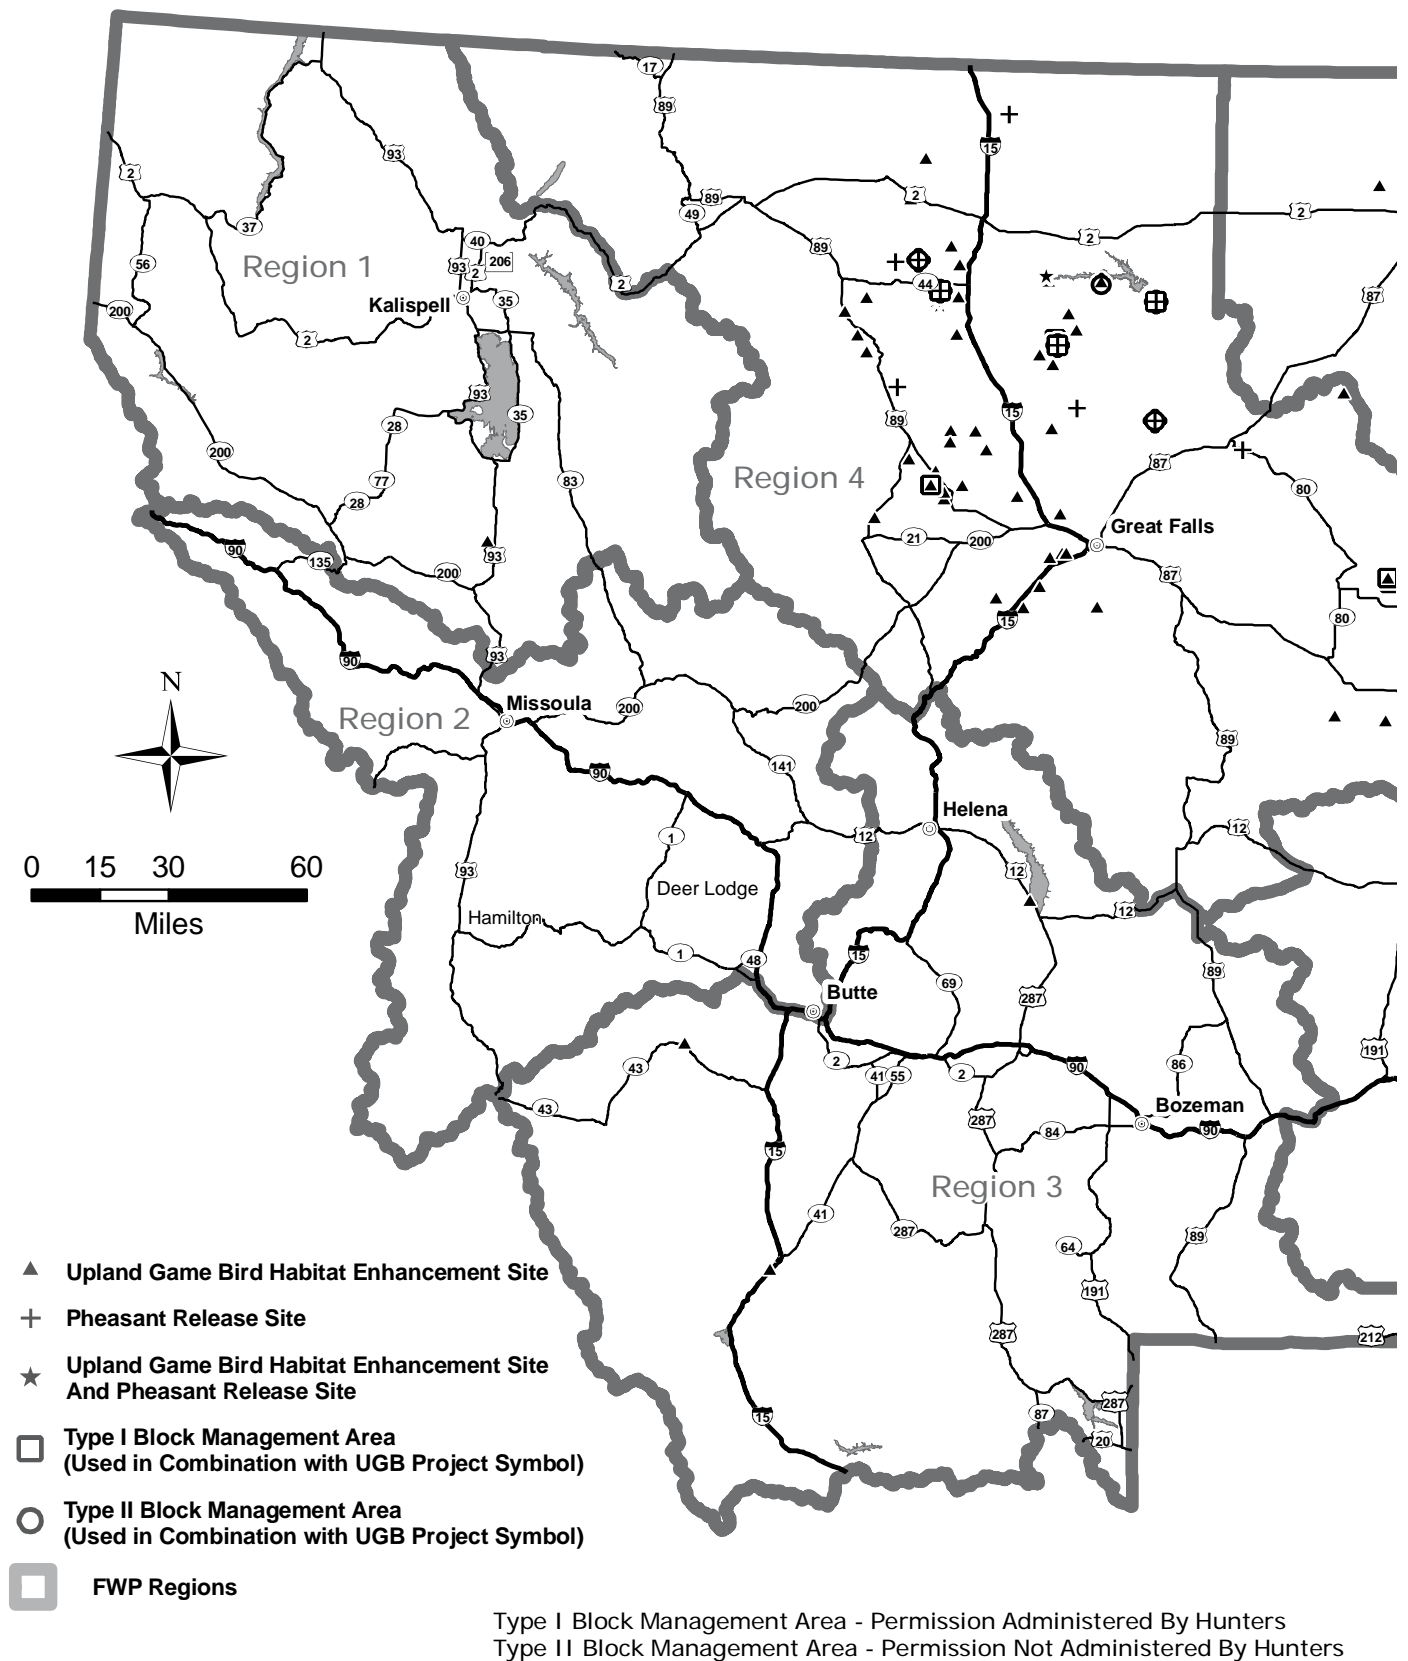

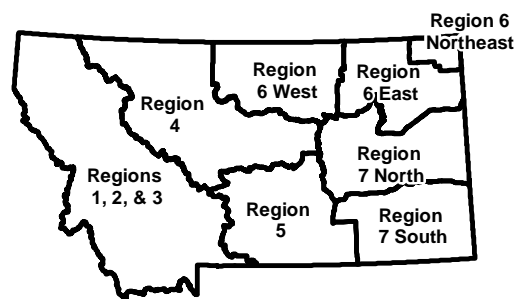

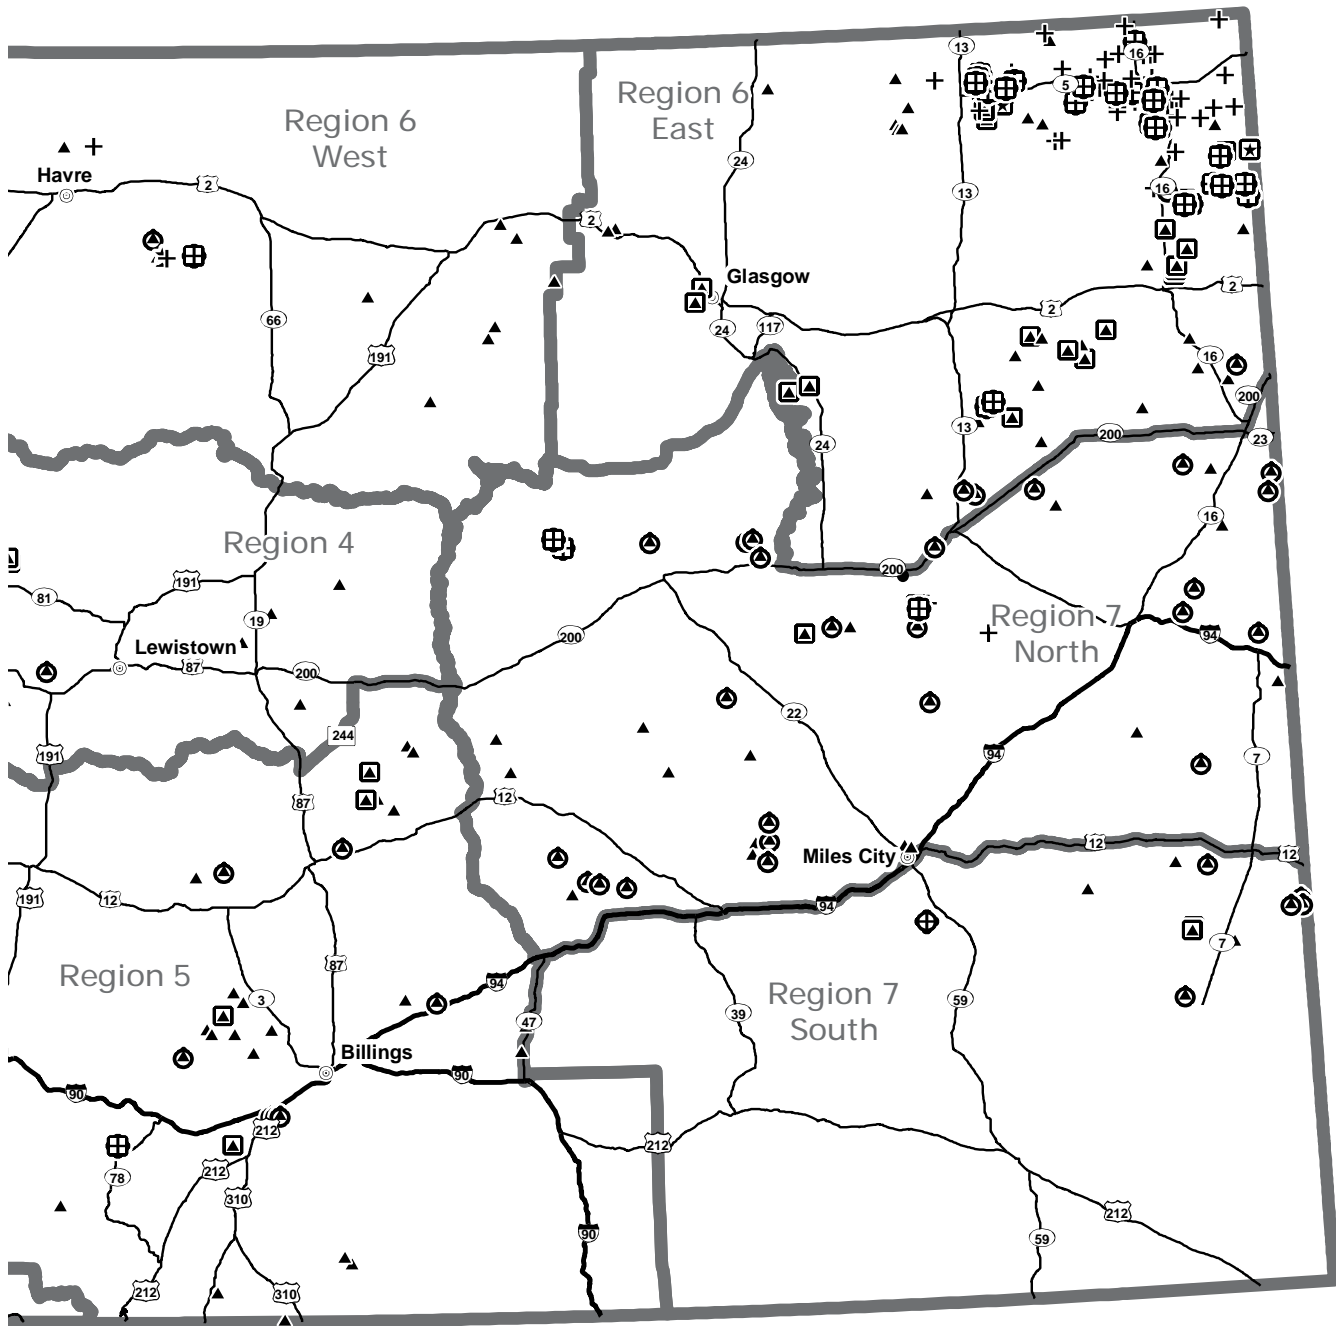

Leafy Spurge

Diffuse Knapweed

## 2011 Sunrise-Sunset Tables For Determining Hunting Hours

These tables, including adjustments for daylight savings time, are the official sunrise-sunset tables adopted by the Montana Fish, Wildlife & Parks Commission for hunting in Montana. Authorized hunting hours for the taking of upland game birds and falconry begin one-half hour before sunrise and end one-half hour after sunset each day of the hunting season. **(Do not utilize from other sources).**

### ZONE 1

**INCLUDES:** Flathead, Granite, Lake, Lincoln, Mineral, Missoula, Ravalli and Sanders Counties
